

# Charles Henry Turner, Ph.D.

**1867 - 1923**

Ph.D. Zoology, 1907  
University of Chicago

Charles Henry Taylor, Professor and Chair of the Department of Science and Agriculture at Clark College in Atlanta, Georgia was a prolific author (over 70 publications) whose work

crossed multiple disciplines. He is most well-known for research which established that honey bees see in color and recognize patterns. He was a life long civil rights advocate who

made the argument that racism could be conquered through education and published articles on this in 1897 and 1902.
