

The Clinical Psychology Ph.D. at the University of Maryland, Baltimore County (UMBC) is uniquely embedded within the Human Services Psychology (HSP) Program, which emphasizes an integrative, biopsychosocial perspective on community, mental health, and physical health.

We approach clinical psychology with an awareness of biological, social, and community factors as well as behavioral and psychological ones, and appreciate their complex interplay. In addition to training in clinical practice in intervention and assessment, research is a central component. Program faculty and students conduct studies on a wide range of topics, with methods ranging from laboratory studies to applied clinical and community settings. We pride ourselves on strong partnerships with underserved and diverse populations.

CLINICAL PSYCHOLOGY
